

Apprenticeship frameworks available for the Apprenticeship+ project

Scotland list

Please see below the craft-based apprenticeship courses currently approved by Skills Development Scotland for delivery in Scotland. Other standards are available to search at <https://apprenticeships.scot/browse-frameworks/> but if you wish to apply for Apprenticeship+ support you will need to make a case for why you believe this specifically includes the transmission of heritage craft skills.

On each of the standards listed below, click on the first link for more information, and on the second link to view the learning providers from which your potential apprentice will need to gain their off-the-job element of their training, either day-release, block release or at the apprentice’s workplace (if available).

** Please note that several standards (marked with asterisks) appear to be on pause or lacking training providers, but the information listed may not be entirely up-to-date. If you are interested in pursuing these, please [get in touch](#) and we will find the latest details for you.*

Name	SCQF Level	Typical length	More details	Off-the-job learning providers
Boat building and repair	6	36 months	Click here for more details	Contact us for more information
